DWA_07.4 Knowledge Check_DWA7

_____

1. Which were the three best abstractions, and why?

Perhaps the abstractions that group together the HTML are the most effective, as they remove a lot of the code that is difficult to read into a separate module. The html object reflects the "Open closed principle" as it is very easy to add, but modification would mean the modification of HTML data- elements.

_____

2. Which were the three worst abstractions, and why?

The abstractions created in the view.js module were perhaps the most disorganized.

_____

3. How can The three worst abstractions be improved via SOLID principles.

Perhaps the most useful way to apply the SOLID principles would be to revise the code taking into account the single-responsibility principle – making sure that all classes and modules have one responsibility – which in the view.js I'm not sure has been considered at all.
